

## Statement of Compliance with Toxic Substances Control Act (TSCA)

February 07, 2023

The Toxic Substances Control Act or TSCA was enacted in 1976 to prevent unreasonable risk of injury to human health or the environment associated with the manufacture, processing, distribution in commerce, use, or disposal of chemical substances. This act provides EPA with authority to require reporting, recordkeeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.

The EPA has, as of January 6, 2021, prohibited the following five (5) substances as persistent, bioaccumulative, and toxic (PBT) chemicals:

- 1) decabromodiphenyl ether (decaBDE)
- 2) phenol, isopropylated phosphate (3:1) (PIP (3:1))
- 3) 2,4,6-tris(tert-butyl) phenol (2,4,6-TTBP)
- 4) hexachlorobutadiene (HCBd)
- 5) pentachlorothiophenol (PCTP)

Exxelia Ohmcraft manufactures precision resistors and specialty electronic components and sensors. The constituents or chemistry of the products we make are listed in the TSCA database. However, the five (5) chemicals listed above are not added during the manufacturing process.

The above information is based on our current level of knowledge from all our materials and component suppliers but not corroborated by independent analyses. Some products are proprietary, and suppliers may choose to not reveal all ingredients. Ohmcraft therefore makes no warranties, expressed or implied, and assumes no liability in connection with the accuracy of this information.

We make every effort to source products responsibly. We also want our customers to make informed purchasing decisions including learning more about TSCA. For more information, please visit the following website: <https://www.epa.gov/laws-regulations/summary-toxic-substances-control-act>.

Be assured, Exxelia Ohmcraft will continue to monitor the TSCA regulations for any new chemicals and inform its customers accordingly.
